## CONTROL STICK FUNCTION

The Nintendo® 64 Controller contains a **CONTROL STICK** which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + **CONTROL PAD**.

When turning the Control Deck power ON, do not move the **CONTROL STICK** from its neutral position on the controller.

If the **CONTROL STICK** is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the **CONTROL STICK** to operate incorrectly.

To reset the neutral position once the game has started, let go of the **CONTROL STICK** so it can return to its center position (as shown in the picture on the left) then press **START** while holding down the **L** and **R** **BUTTONS**.

The **CONTROL STICK** is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

## LOADING

1. Make sure the power is OFF on your Nintendo® 64 Control Deck.
2. Insert your N64 MM 59 Nintendo® 64 Game Pak into the Control Deck as described in the instruction manual.
3. Insert Controller(s) into sockets 1-4.  
Note: N64 MM 59 is for up to 4 players. Each must have a controller.
4. If you wish to save a game, insert a Nintendo Controller Pak (sold separately).
5. Slide the power switch to ON (important: make sure not to touch the Control Stick when doing so).

## DEFAULT CONTROLS

### OFFENSE

#### Shooting

When your team has the ball the **SHOOT** **BUTTON** will cause you or your computer teammate to shoot for the basket. Your player releases the ball when you release the button. Releasing the ball at the apex of your leap gives your shot greater accuracy, but releasing it quickly or very slowly can often prevent a leaping defender from blocking or stealing the ball. Tapping **SHOOT**

quickly several times executes a **hard-lake** which may trick the defender, but it stops your stride, so you must either pass or shoot the ball before you can move!

#### Passing

When your team has the ball, the **PASS** **BUTTON** will cause you or your computer teammate to pass the ball to his teammate. But a defender easily intercepts a passed ball, so look before you pass!

#### Turbo

Turbo causes your player to run much faster than he normally would (determined by his attributes), whether on offense or defense, allowing you to blow by a defender, or to slip around a pick and knock a steal! Your turbo is unlimited, but be aware that when the Fatigue option is ON, using Turbo will wear down your player, leaving him to show dazed and red injury.

## Icon Meaning

When set (On) icons appear above the heads of the available teammates for passing options.

Play Calling

Call for Pick (An action on the court.)

Special Moves (Special double moves such as crossover and behind the back are executed.)

Banking In (Back a player down on the low post.)

Call for Alley-oop (Automatic alley-oop function occurs if receiver is close to basket.)

## Playbook

Just like any coach in the NBA, you have the opportunity to call plays. The playbook is designed to allow you to save all 100 plays from the playbook pool. In addition, you can set plays for simulation. The playbook lets you "mark" plays from a field of 100+. The four plays the user has marked will be the default plays during game play. You can mark plays throughout the game, as well as before. During game play, bring up the playbook by pressing **C2**.

A field of four plays will appear. Push the button corresponding to the desired play and that play will be executed.

## Calling plays:

(Press **START BUTTON** to show on)
- Press the **CORRESPONDING BUTTON** to select the desired play.

When your team does not have the ball, the **BUMP/BLOCK BUTTON** causes your player to jump up for a block. Timing is crucial to timing the shot. Jump too early and the shooter can wait until you fall out of the way, jump too late and the shooter can shoot it over you! Many times your defender will get a piece of the ball without rejecting the shot completely.

## Steal

When your team does not have the ball, tapping the **STEAL BUTTON** causes your player to swipe at the ball in the hope of either stealing it or knocking it out of an opponent's hands.

## Turbo

See Turbo details under Offense/Turbo (page 6).

## Control Stick

Switch to the Player next on the roster.

## Push

Press the **PUSH** controls to give your opponent an emphatic shove. Depending on your foul-calling settings (under Options) you may clear an offensive player out of the way or have a foul called.

## Defensive Stance

The allows you to take a defensive charge stance and try and draw a foul.
